

APPLIANCE ENGINEER

Subject/author index for Volume 5

This subject and author index is your guide to technical data published in Volume 5 of APPLIANCE ENGINEER for calendar year 1971.

In the subject index, individual papers may be listed more than once according to subject matter. All issues are from Volume 5. Numbers outside parentheses refer to issue numbers. Numbers in parentheses refer to page numbers.

Address all inquiries to APPLIANCE ENGINEER, Reader Service Dept., Dana Chase Publications, Inc., York St. at Park Ave., Elmhurst, Ill. 60126.

AUTHOR INDEX

Becker, Stephen and Knoop, Dr. Donald E.; "A solid-state control for electric range surface units," 3 (25)

Butt, Sheldon H.; "Electrical material choices for miniaturizing electrical terminals and connectors," 6 (16)

Collins, Henry E.; "Advanced services and research at Underwriters' Laboratories," 1 (29)

Elders, Alvin J.; "Statistical reliability models for appliance components," 5 (17)

Foster, Edwin; "Design considerations for die cast gears," 2 (27)

Granieri, George J.; "Solid-state protector for residential and commercial air conditioners," 5 (24)

Greshel, Leonard J.; "Life cycle testing of electrical switches," 4 (30)

Knoop, Dr. Donald E. and Becker, Stephen; "A solid-state control for electric range surface units," 3 (25)

Lamar, Charles C.; "Oxygen depletion sensor improves safety of gas-fired heating equipment," 1 (21)

Liebermann, John; "An international appliance market," 5 (3)

Mullin William H.; "Refrigerator design and development—a source of quality," 6 (22)

Newell, Robert W.; "Challenge to the designer for modular appliance construction," 4 (3)

Ricklin, Saul; "Fluorocarbon materials for the appliance industry," 4 (27)

Searight, Edward F.; "New developments in gas-fired appliances," 3 (31)

Stang, Charles, Jr.; "An examination of the appliance pressure regulator standard," 4 (34)

Sygnator, Henry A.; "Criteria for fastener selection," 2 (21)

Webster, Leonard A.; "Solid elastomeric polyurethane to improve product design," 5 (31)

Woods, Lee O.; "Systems approach to motor-starting relay applications," 5 (36)

SUBJECT INDEX

- Adhesives, 2 (11, 13, 52), 4 (12, 47), 5 (55, 56), 6 (9)
- Air conditioning, 1 (10, 52), 2 (13, 34), 3 (4, 31, 48), 5 (24, 44)
- Appliance servicing, 4 (37), 5 (45)
- Appliance Suppliers Exhibit and Conference, 1 (6, 44), 2 (38), 3 (3), 4 (9)
- Appliance Technical Conference, 2 (7), 3 (51)
- Batteries, 6 (11)
- Coatings, 1 (11), 2 (12, 50), 3 (51), 5 (12, 13), 6 (10, 21, 29)
- Chemical coating, 1 (11, 49), 5 (13)
- Laminates, 4 (10, 13)
- Commercial appliances, 3 (48)
- Connectors and terminals, 2 (13, 50), 4 (48)
- "Electrical material choices for miniaturizing electrical terminals and connectors," 6 (16)
- Consumer electronics, 1 (4, 33, 37), 2 (49, 53), 3 (48), 4 (47)
- Consumerism, 2 (38), 3 (57)
- Controls, 1 (28), 2 (12), 3 (25, 54), 4 (12, 13, 47, 51), 5 (24, 51)
- Design
- Kits, 2 (10, 12)
- Problem feedback, 1 (13)
- Techniques, 2 (27, 42), 4 (43), 5 (45), 6 (22)
- Dishwashers, 3 (47), 5 (40)
- Editorial Advisors, 1 (12)
- Electric heating, 1 (51, 55), 2 (12), 3 (4, 16, 48), 4 (10, 13, 47, 49), 5 (14, 52)
- Electric housewares, 2 (27), 3 (48), 4 (41), 5 (51)
- Engineering management, 4 (43)
- Fans and blowers, 1 (52), 2 (49), 4 (47), 5 (51)
- Fasteners, 1 (51), 2 (10, 21, 49), 3 (8, 16), 4 (11, 47, 50), 5 (14, 51, 52, 53, 57)
- "Criteria for fastener selection," 2 (21)
- Fluidics, 2 (10, 42)
- Gas heating, 1 (21), 2 (35), 3 (4, 31), 4 (47)
- Gas ignition, 1 (11, 21), 3 (16), 4 (47)
- Gas technology, 4 (34)
- Gas Appliance Engineers Society technical papers, 3 (55)
- "Gas conference balances applied and basic research," 2 (34)
- "New developments in gas-fired appliances," 3 (31)
- "Oxygen depletion sensor improves safety of gas-fired heating equipment," 1 (21)
- Gears, 2 (27), 5 (39)
- Home laundry, 1 (55), 2 (11), 3 (39, 47), 4 (25, 40), 5 (12, 40, 57)
- Instrumentation
- Reference book, 1 (49)
- Test instruments, 1 (10), 3 (8), 4 (10), 5 (13), 6 (10, 11)
- International Appliance Market, 5 (3)
- Lubrication, 4 (11, 43), 5 (24), 6 (10)
- Magnets, 1 (55), 2 (52), 6 (8)
- Materials, 3 (3), 6 (11)
- Glass, 2 (51)
- Metals, 1 (10), 2 (12, 50, 51), 3 (39), 4 (11, 12, 48, 49), 5 (12, 45), 6 (10, 11, 21, 29)
- "Baseboard heating design using pre-coated steel," 6 (21)
- "Design considerations for die-cast gears," 2 (27)
- Plastics, 1 (4, 10, 11, 12, 34, 49, 53, 55), 2 (10, 43, 50, 51), 3 (8, 54), 4 (10, 49, 51, 53), 5 (31, 51, 55, 56), 6 (8, 9, 29)
- Fluorocarbons, 3 (55), 4 (10, 13)
- "Fluorocarbon materials for the appliance industry," 4 (27)
- "Solid elastomeric polyurethane to improve product design," 5 (31)
- "Washer/dryer merits top award in plastics," 4 (40)
- Reference works, 1 (49), 2 (43), 4 (43)
- Modular appliances, 2 (35), 3 (31, 57), 4 (3, 21)
- "Modular appliance wiring systems," 4 (21)
- Motors, 2 (11, 13, 49, 51), 4 (9, 12), 5 (36, 51, 53, 55), 6 (8)
- Processing, 2 (10, 11, 12, 27), 3 (8, 16), 4 (10, 13, 27, 43, 49), 5 (12, 13, 32, 45), 6 (10, 29)
- Product management, 4 (43)
- Range/oven, 1 (11), 3 (3, 25, 47, 55), 4 (10, 21), 5 (53)
- Refrigeration, 1 (52), 3 (47), 4 (24, 31), 5 (13)
- "Refrigerator design and development —a source of quality," 6 (22)
- Relays, 1 (51, 53), 4 (51), 5 (12, 14, 36, 55)
- "A role for relays in appliance design," 3 (41)
- "Relays applicable to appliances," 3 (42)
- Survey, 1 (47)
- Survey analysis, 3 (47)
- "Systems approach to motor-starting relay applications," 5 (36)
- Reliability, 3 (41, 51, 54), 4 (30, 32, 43)
- "Statistical reliability models for appliance components," 5 (17)
- Research and development, 5 (13)
- Safety, 1 (21, 29), 2 (13), 4 (30)
- Sensitivity analysis, 3 (54)
- Solid state, 1 (37, 53), 2 (11), 3 (54), 4 (48, 49, 50), 6 (9)
- Integrated circuits, 1 (33, 49), 2 (13)
- "Process breakthrough for integrated circuits," 1 (33)
- Printed circuits, 1 (10), 4 (43)
- Reference works, 2 (42), 3 (54), 5 (45)
- Silicon controlled rectifiers, 1 (49), 2 (52), 3 (8, 16, 54)
- "Solid state consolidates design strengths," 6 (33)
- "Solid state control for electric range surface units," 3 (25)
- "Solid state protector for residential and commercial air conditioners," 5 (24)
- "Thick film hybrid technology," 1 (37)
